

KOLL

ALUMINUM CARABINER

REF: 301-3L

1

CHARACTERISTICS

KOLL carabiner is made of aluminum AL-7075 of high strength, the user can easily cling to the equipment due to its symmetrical shape, because of its weight it is special for relief agencies and military forces. Works for connection between protective equipment against falls. Recommendations for use: Special for connecting work teams at heights, demanding jobs and rescue work. Features: Forged aluminum alloy AL-7075. Finished anodized. Symmetrical figure. Profile in H, to protect the marking of wear.
